

Shahriar Mahmud

Senior Software Engineer | FinTech & SaaS Platform Specialist | Microservices & Scalable Systems

WA/Call: +8801773071269 | Mail: shahriar.ruet14@gmail.com | linkedin.com/in/shahriar-ruet14 | github.com/shahriarRUET14

Senior Software Engineer with 6+ years of experience designing and building scalable FinTech and SaaS platforms.

Expert in microservices architecture, high-volume transaction systems, and distributed backend services.

Proven track record of handling 20M+ BDT daily transactions with zero mismatch.

Strong experience in Spring Boot, Ruby on Rails, and cloud-ready architectures.

Experienced in leading engineering teams, system design, and delivering production-grade systems.

Key Achievements & Impact

- Built and scaled multi-vendor FinTech platforms (Lenden, TeleCash, MyCash) serving thousands of users
- Processed ~20M+ BDT daily transactions with 99.99% accuracy and zero reconciliation mismatch
- Led backend architecture for digital wallet systems ensuring high availability and scalability
- Delivered end-to-end fintech ecosystem (web, mobile, backend) across 8+ applications

Work Experience

6+ Year

RedDot Digital Limited | Senior Software Engineer

Period: Jul 2026 to Till

Mobile Financial Solution (**MFS**) – FinTech platform powering LENDEN, TeleCash, and MyCash

- Designed and contributed to a microservices architecture consisting of 24+ Spring Boot services
- Led backend development for LENDEN and TeleCash, ensuring scalable, reliable, and high-availability financial services.
- Built and maintained ecosystem supporting 2 web portals and 6 mobile apps used by X+ users including:
 - 2 Web Portals: Angular (Back Office) and React.js (User Portal)
 - 6 Mobile Applications: Flutter
- Designed common service modules which are used across multiple MFS platforms.
- Participated in system design discussions, code reviews, and engineering process improvements to maintain code quality and scalability.
- Mentored engineers across development, QA, and Operation teams.
- Worked closely with clients and product teams to align technical implementation with business requirements.
- Took ownership of complex technical challenges and production issues to ensure timely delivery.

Sales & Distribution Ecosystem - Multi-Category | eCommerce

- Developed a multi-tenant SaaS platform supporting B2B sales & distribution and e-commerce order/delivery systems.
- Built backend services using Ruby on Rails, enabling scalable tenant-level customization.
- Contributed to a shared platform architecture powering multiple products from a single codebase.
- Worked with Next.js storefront and React.js backoffice applications.

Together Initiatives (p) Limited | Software Engineer

Period: Mar 2020 to Jun 2026

ProcessMaker – Enterprise Workflow Automation

- Customized ProcessMaker (open-source BPM platform) for Robi enterprise workflow automation.
- Developed 500+ digital workflows to automate internal business processes.
- Implemented custom forms, logic, and integrations to support process digitalization.

Other Projects

- ❖ VAS Portal: Built and maintained a Value-Added Services portal for efficient service management and reporting.
- ❖ Bank Reconciliation System: Automated financial reconciliation reducing manual effort by 90%.
- ❖ RPA Network Automation: Reduced repetitive network operations time by 95%.

Technical Skill	Backend First FullStack
Core Skills: Microservices Architecture, Spring Boot, Ruby on Rails, Kafka, REST APIs, FinTech Systems	
Backend: Spring Boot, Ruby on Rails, REST APIs, Microservices	
Frontend: React.js, Next.js, TypeScript	
Database: PostgreSQL, MySQL, Redis	
Messaging: Kafka	
Languages: Java, Ruby, JavaScript	
Others: System Design, Distributed Systems, High Availability, Event-Driven Architecture, Docker, CICD	

Academic Education	2001 to 2020
Rajshahi University of Engineering & Technology(RUET)	Period: Jan 2015 to Feb 2020
Bachelor of Computer Science and Engineering	Rajshahi Bangladesh
Higher Secondary School Certificate GPA: 5 Group: Science	Period: 2012 to 2014
Secondary School Certificate GPA: 5 Group: Science	Period: 2010 to 2012

Soft Skill
Technical Leadership System Design Team Mentorship
